

# 7" Stargate *FHD* monitor.

The 7" *Stargate FHD* combines Transvideo unrivaled performance in the sun and "fast path processing" to provide latency-free images in a FULL HD resolution monitor/recorder.

The 7" *Stargate FHD* full HD resolution accepts 3G, HD SDI and HDMI. It includes an HDMI to SDI upconverter. Combined with Transvideo unique fast processing, it displays high resolution images in real time with zero delay.

Focus Pullers can rely on the *Stargate speed and resolution* to work accurately and never fall behind. Of course Adjustable Focus Helper, Adjustable Peaking and Custom Zooms are standard functions.

The 7" *Stargate FHD* is a SuperBright monitor perfect for working in **full sun**. It does *not* compromise performance in the sun to deliver full resolution images. The ability to pull focus precisely is not diminished when shooting outdoor.

**No learning curve:** with Transvideo user-friendly interface and pre-programmed job-oriented views the user wastes no time searching through complicated menus. In addition, pre-configured views can be quickly customized to fit the user's needs.

The **built-in dailies recorder/player** with convenient auto-rec function allows the user to playback takes stored on memory cards (H264). The monitor also converts the H264 files to MPEG4 format.

The 7" *Stargate FHD* is built in compliance with Transvideo unmatched **quality and durability**. The housing is machined out of solid aluminum (no molding).

The optical glass protects the display without adversely affecting the image crispness. Broadcast quality gold contacts connectors preserve the HD signal integrity.

The monitor has 1/4-20 mounting threads on the back and at the bottom. Transvideo International offers a side bar and a top bar each with 1/4-20 threads to provide more mounting options.

## FEATURES INCLUDE:

- Built-in Recorder/Player.
- 1920x1080 Full HD resolution.
- 800 Nits SuperBright display.
- Viewing Angle: +/- 85° H/V.
- 1x 3G/HD/SDI, 1x HDMI inputs.
- HDMI to SDI upconverter.
- Peaking & Focus Helper Tools.
- Digital Horizon.
- Tally.
- Pixel to Pixel image.
- Custom Zoom
- Image Flip/Flop
- False Colors.
- Logs & HDR.
- Programmable 3D LUTs.
- Adjustable Markers.
- 10-36v DC. 1.4Amp @ 12v
- Outputs: 1x 3G/HD/SDI (Processed or OSD).  
1x HDMI
- Supported Standards:  
**3G:** 1080 / 50p, 60p  
**HD:** 1080 / 50i, 60i  
1080 / 24p, 25p, 30p  
720 / 25p, 30p, 50p, 60p

# 7" Stargate *FHD* monitor

## ACCESSORIES:

Replacement Screen Shield (anti-reflective) for 7" Stargate. Magnets snap-on system.

Hard **Hood** for 7" Stargate monitor with snap-on magnetic mount for exact & quick placement. 1" deep.
