

MONITORS TRAINING.

Private Training:

Most of our customers are already familiar with our monitors and have often already operated with them.

Let us know if you are not familiar with the monitor you have ordered, and we will set aside 1 hr for a one-on-one crash course on your monitor's different functions.

This service is provided free of charge to our customers and for a fee to others.

First Use:

Even though Transvideo equipment is very user friendly, call or email us if you have any question about your equipment. We can guide you in a few minutes through the various functions and menus to make your first experience as easy as possible. Our goal is to make sure that you are relaxed on set and satisfied from the first use.

Body-Rig Set-up:

If you come to pick-up your monitor in our office we recommend you to bring your rig in so that we can make sure all the cables and brackets are as expected and compatible.
