

Enjoy the freedom of wireless with the Titan Receiver on your monitor.

The 5" Rainbow monitors (I or II) and the 16/9 Rainbow monitors (5.8" or 6.5") can be equipped with a convenient professional Handle/battery back. The battery backs feature a comfortable integrated handle and a battery socket (Anton-Bauer, NP1 or PAG). Accessorized with the Titan Receiver and a Handle/battery back the monitors become completely wireless and provide total freedom of movement to the viewer.

Quick battery changes:

NP1 batteries are loaded into the battery back from the side of the monitor so that the Receiver will never get in the way.

PAG batteries snap on the back of the battery back and the Receiver will not get in the way either.

Anton-Bauer batteries are snapped in place from the top. When the Receiver sits on top of the Anton-Bauer battery back it must be swung out of the way: untie one of the two tie-down knobs, swing the receiver to one side (photo 5), change the battery and secure the Receiver back in place.
